

VARIAIR CONTROLLER+

BECKER VARIAIR CONTROLLER+ FOR SYSTEM SOLUTIONS

The controller is easily adjustable to individual requirements. The VARIAIR Controller+ is a sustainable technology and solution to control and monitor air supply systems. Vacuum and pressure pumps, equipped with or without Becker frequency converter technology (VARIAIR Units), can merge into user-friendly complete systems. Different types of pumps, for instance side channel blowers and rotary vane pumps, can be combined and tailored to suit a specific need as a VARIAIR Central System.

ADVANTAGES

- Suitable for all systems; retrofitting is possible
- Optimized operation for each specific application
- Intuitive operating interface
- Consistent software design and hardware for numerous types of systems
- Support of various languages and units of measurements
- Overall control and monitoring of the controller via customer network possible
- Logging and diagnostic tool
- Reduction of wear due to bundling of all pumps
- Manual operation mode
- Interactive assistance and demonstration of maintenance procedures

CUSTOMIZATION

- Simple upgrade capability due to modular component design
- Easy integration of customer specific parts and components
- Customizable graphical user interface e.g. customer logo
- Easy implementation of additional application specific features
- Fieldbus and Ethernet options available

EFFICIENCY

- Full support and integration of VARIAIR Units
- Sensor guided control for up to 8 pressure levels
- Increase of service life due to balanced run time of each pump
- Improved energy efficiency when bundled into a system
- Reduced service costs

VARIAIR Central System incl. VARIAIR Controller+

BEST IN CLASS

Gebr. Becker GmbH Hoelker Feld 29-31 42279 Wuppertal Germany T +49 202 697 0 F +49 202 660855 info@becker-international.com www.becker-international.com

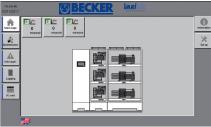

SPECIFICATIONS

- VARIAIR Controller+ with 7" or 10.1" Touchscreen or without display
- All components UL/CSA listed
- Protection class according to EN60529, Touchscreen (front side) IP65
- THE BECKER SOLUTIONS
- The Becker VARIAIR Controller+ is the ideal controller solution for:
- VARIAR Central Systems (VACS)
- Central systems
- Tank mounted vacuum systems
- Rack systems
- The interchangeability of old Becker systems is possible

Central System with VADS

screw vacuum pumps

Vacuum System with rotary vane vacuum pumps and tank

Maintenance free, no hard disk, fan or battery

Various types of digital and analog modules available

All components available worldwide

Fieldbus and Ethernet options available

• The following products can be integrated:

- Dry running rotary vane pumps

- Screw pumps

- Radial blowers

- Side channel blowers

- Oil lubricated rotary vane pumps

VARIAIR Central System with side channel blowers and rotary vane pumps

- Typical applications are:
- Vacuum packaging for the food industry
- Vacuum supported hold-down CNC router tables for the wood working industry
- Handling, separation and transportation of paper for the printing industry
- Handling (pick and place) of electronic components in clean room environments
- Aspiration applications for the medical and dental industry
- Manufacturing and packaging of cigarettes for the tobacco industry

OUR SOLUTION COMPONENTS

CUSTOMIZATION

We develop customized solutions for your individual requirements and applications.

EFFICIENCY

We optimize your air supply to ensure a better efficiency for your complete system.

BEST IN CLASS

Gebr. Becker GmbH Hoelker Feld 29-31 42279 Wuppertal Germany

SUPPORT

Our consulting and planning add value to your individual application for an optimal solution.

COMPETENCE

With over 130 years of experience, we have the expertise to create innovative solutions for your current and future needs.
